

Birds of Sicily: annotated Check-list*

*updated after: Massa B., Ientile R., Aradis A. & Surdo S., 2021. One hundred and fifty years of ornithology in Sicily, with an unknown manuscript by Joseph Whitaker. Biodiversity Journal, 12 (1): 27-89

Last update: 02 October 2021

Legend (subspecies are green coloured)

Check-list of the Birds of Sicily from the half of 1800 to 2020. We report the complete list of Sicilian birds. Overall, the number of bird species found over one hundred and fifty years amounts to 439, of which eleven became extinct (only one belongs to Passeriformes, the others are non Passeriformes). In the caption of the table abbreviations used in the different columns are explained; when it is reported M, W sc it means that the taxon is considered scarce both as migrant and wintering, conversely M sc, W r means that it is considered scarce as migrant, rare as wintering.

Status: A = Accidental; B = Breeder; Ex = extinct; M = Migrant; RB = Resident Breeder; SB = Summer Breeder; W = Wintering; vc = very common; c = common; sc = scarce or fairly common; r = rare; vr = very rare; irr = irregular; occ = occasional; reintr = reintroduced; al = alien species.
in = increasing; vin = very increasing; dec = declining; vdec = very declining; st = stable; flu = fluctuating.

The trend of Sicilian birds over one hundred and fifty years

After having carried out the check-list trend since the half of 1800 (Doderlein, 1869-1874) to nowadays, we established seven categories of the population trend: i) stable (st), when no differences have been noticed; ii) declining (dec), when objective diminution of the population was observed; iii) very declining (vdec), when a notable diminution of the population was observed; iv) increasing (in), when the population, originally scarce, became more abundant; v) very increasing (vin), when the population passed from rare or scarce to common or very common; vi) fluctuating (flu), when no precise trend was observed, in particular neither declining nor increasing, but with numbers that fluctuated over the years; vii) extinct species (Ex), those presently vanished, but formerly resident breeder.

We reported the occurrence by every author as follows: very common (vc); common (c); scarce or fairly common (sc); rare (r); very rare (vr); irregular (irr), that is a species observed 3-8 times in ten years; occasional (occ), that is a species observed 1-2 times in ten years; reintroduced (reintr); alien species (al); the species observed every year or 9 times in ten years are considered regularly present in Sicily. In the final discussion, and also in the frequency of occurrence of each category irregular or accidental taxa were not considered and subspecies were not considered as separate taxa.

We would highlight that the trend presented in the present paper is referred to the wide time span of one hundred and fifty years, and it should not be regarded as a more recent trend.

Changes and variations made from the original version are underlined in yellow.

20	<i>Melopsittacus undulatus</i>	(Shaw, 1805)	Budgerigar	Parrocchetto ondulato	AU : Australia	
21	<i>Agapornis roseicollis</i>	(Vieillot, 1818)	Rosy-faced Lovebird	Inseparabile dal collo rosa	AF : sw	
22	<i>Agapornis fischeri</i>	Reichenow, 1887	Fischer's Lovebird	Inseparabile di Fischer	AF : Tanzania	
23	<i>Corvus albus</i>	Müller, PLS, 1776	Pied Crow	Corvo bianconero	AF : Mauritania to Sudan and Somalia, s to s South Africa and Madagascar	
24	<i>Leiothrix lutea</i>	(Scopoli, 1786)	Red-billed Leiothrix	Usignolo del Giappone	OR : Himalayas to e China and ne Vietnam	
25	<i>Gracula religiosa</i>	Linnaeus, 1758	Common Hill Myna	Merlo indiano	OR : widespread	
26	<i>Lamprotornis superbus</i>	Rüppell, 1845	Superb Starling	Storno superbo	AF :: Ethiopia and Somalia to Tanzania	
27	<i>Passer luteus</i>	(Lichtenstein, MHK, 1823)	Sudan Golden Sparrow	Passero dorato	AF : Mauritania and Senegal to Sudan, Eritrea and Ethiopia	
28	<i>Ploceus subaureus</i>	Smith, A, 1839	Eastern Golden Weaver	Tessitore dorato africano	AF : e, se	
29	<i>Amandava amandava</i>	(Linnaeus, 1758)	Red Avadavat	Bengalino comune	OR : widespread	

Legend Breeding range

North America (NA)—includes the Caribbean

Middle America (MA)—Mexico through Panama

South America (SA)

	Latin America (LA)—Middle & South America: Replaced with MA, SA 6.3
	Africa (AF)—entire continent rather than south of Sahara
	Eurasia (EU)—Europe, Asia from the Middle East through central Asia north of the Himalayas, Siberia and northern China to Japan.
	Oriental Region (OR)—South Asia from Pakistan to Taiwan, plus southeast Asia, the Philippines and Greater Sundas.
	Beaman 1994 (Palearctic Birds: A Checklist of the Birds of Europe, North Africa and Asia north of the foothills of the Himalayas), provides a working definition of the boundary between the Palearctic and Oriental regions, which can be summarised as follows, courtesy of Richard Klim: “In southern Asia the boundary runs from the Makran coast of Pakistan at Ras Ormara northwards to the Harboi Hills and the mountains of Quetta, and along the Sulaiman Range. The line then runs along the mountainous borderlands of Pakistan and Afghanistan, the main range of the Himalayas, the mountains at the extreme northernmost tip of Myanmar, the Lijiang Range in northern Yunnan and the mountainous western margins of the Red Basin of Sichuan [species included are limited to those known to occur at or above: 2000m in northwestern Pakistan and adjacent Afghanistan, the northwestern Himalayas (Pakistan/Kashmir) and central/northern Sichuan; 2500m in the western Himalayas (Himachal Pradesh), northern Yunnan and southern Sichuan; and 2800m in the eastern Himalayas (Nepal to Arunachal Pradesh) and northernmost Myanmar]. In eastern China, the boundary follows the Yangtze/Huang Ho watershed in southern Gansu, the Qinlang Shan in Shaanxi, and then the 34°N line to the Yellow Sea coast. On the Pacific fringe, the Nansei, Daito, Kazan and Ogasawara Islands are included.”
	Australasia (AU)—Wallacea (Indonesian islands east of Wallace’s Line), New Guinea and its islands, Australia, New Zealand and its subantarctic islands, the Solomons, New Caledonia and Vanuatu.
	Atlantic, Pacific, Indian, Tropical, Temperate, Northern & Southern Oceans (AO, PO, IO, TrO, TO, NO, SO)
	Antarctica (AN)
	Southern Cone (So. Cone) includes Argentina and Chile south of the Tropic of Capricorn, also Falkland Islands.
